Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Modeste et al. (hereinafter "Modeste", US 2003/0056012 A1).

As per claim 1, Modeste discloses a remote control method for controlling electrical appliances via home gateway comprising the act of:

- Preparing a main board to selectively connect to an INTERNET (paragraphs [0004, 0034, 0036, 0042]);
- Dialing a phone call to the main board to initiate the main board (paragraphs [0006, 0037, 0040]);
- The main board connecting to the INTERNET (paragraphs [0003, 0006, 0034, 0039]);
- Acquiring a pre-registered IP address from a DNS server (paragraphs [0004, 0034, 0049, 0084]); and
- Using a tool accessible to the IP address for communicating with electrical

appliances, wherein a data confirmation step is added before the step of the main board connecting to the INTERNET so as to confirm the data input to the main board to initiate the main board (paragraphs [0037, 0051, 0070-0071, 0074]).

As per claim 2, Modeste discloses the remote control method as claimed in claim 1, wherein the main board has a controller with two ports (paragraphs [0036, 0042-0046]).

As per claim 3, Modeste discloses the remote control method as claimed in claim 2, wherein one of the ports is a hub (paragraphs [0036, 0040-0042]).

As per claim 4, Modeste discloses the remote control method as claimed in claim 3, wherein the other one of the ports is a WAN port (paragraphs [0034]).

As per claim 6, Modeste discloses the remote control method as claimed in claim 1, wherein the main board further has a modem connecting port (paragraphs [0034, 0036, 0038]).

As per claim 7, Modeste discloses the remote control method as claimed in claim 6, wherein the main board further has a modem connecting port (paragraphs [0034, 0036, 0038]).

As per claim 8, Modeste discloses the remote control method as claimed in claim 1, wherein the tool includes PC, PDA, GSM mobile phone, WAP mobile phone, GPRS phone or a Webpad (paragraphs [0004]).

As per claim 9, Modeste discloses the remote control method as claimed in claim 1, wherein the main board further has a power line modem (paragraphs [0034, 0036, 0038]).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Modeste et al. (hereinafter "Modeste", US 2003/0056012 A1) in view of Hayes et al. (hereinafter "Hayes", US 6,480,586 B1).

As per claim 5, Modeste discloses the remote control method as claimed in claim 1.
Modeste does not explicitly disclose wherein the main board further has a fax server so as to transmit and receive information. However, in an analogous art, Hayes discloses

Art Unit: 2157

connecting the appliance server to both the caller ID modem and to data/fax modem (column 11, lines 30-40).

Therefore, one of ordinary skill in the art at the time the invention was made would have found it obvious to implement or incorporate Hayes's fax server in Modeste's method in order to receive data via fax.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
